

PHYSICS 3430  
Fall 2015

Lecture: 10:00 - 10:50 a.m. MWF, Physics Building, Room 210

Instructor: Peter Arnold, Physics Building, Room 205

Office hours: M 4-5, Tu 4-5, or by appointment.

If it's a *quick* question, you can try dropping by my office unannounced at other times.

Phone: 924-6813; e-mail: parnold@virginia.edu

Grader: Jie Liu, e-mail: jl5uj@virginia.edu

TEXT: Griffiths, *Introduction to Electrodynamics* (4th edition).

But it's fine if you instead have the 3rd edition.

### Grade weighting

45% Final Exam: **Monday, December 14, 9:00-12:00**

25% Midterm Exam: Wednesday, October 14, in class

30% Homework

**except** that I reserve the right to decide that I want to give some short in-class quizzes (announced in advance) during the semester. If I do, such quizzes would in total count for no more than 5% of the grade (carved out of the 30% for homework)

**Homework:** Will always be due at the start of the class in which it is due. Late homework will be assessed a penalty, which will grow as time increases. (If you know you have some scheduling problem in advance, just talk to me about it in advance.)

**Collaboration on Homework:** Collaborating with your classmates on working out methods of solution is actively encouraged! However, you must write up your solutions on your own—copying someone else's paper is unacceptable. The same is true if at any point you look at a solution on the internet (or in a book). When you are finally writing up your own solution, you may not have someone else's solution in front of you.

As to the internet, I strongly, strongly, strongly discourage you from looking for solutions on the internet except as a very last result, after hours of struggle. And, even then, I strongly recommend asking your classmates and me for help before turning to the internet. You will not learn anything if, to save time in what I know are busy schedules, you make the internet your go-to source for doing the problem sets. No pain, no gain.

**Attendance:** You are responsible for all material presented in class; turning in your homework on time; knowing problem assignments; and knowing any administrative announcements made, such as changes to the syllabus or changes to the scheduling of homeworks or exams.

**Topics covered:** My intention is to cover chapters 8–12 of Griffith. Supplemental material may be added as time permits.
