#### (4) Course Prerequisites

ACCT 5210 Introductory Auditing (mandatory)

#### (5) Course Description

This course builds on the knowledge base from Introductory Auditing, to provide students with an in-depth understanding of professional standards, the audit process, advanced auditing techniques, and the auditor's role in ensuring that publicly issued financial statements are fairly presented. Students will apply auditing procedures to financial statement transaction cycles, and conduct audit sampling and testing techniques. The course will also cover advanced topics concerning complex auditing judgments, and the use of audit software tools.

#### (6) Learning Outcomes

In this Advanced Auditing course, students will build on their understanding of audit theory and its application to the audit of financial statements. The emphasis of this course is on the practical application of audit procedures on realistic financial audit case scenarios. Upon completion of this course, students will gain proficiency in audit planning, evidence collection and documentation, evaluation of internal control, and assessment of fraud risk. Students will also learn to employ computer-based audit testing techniques to conduct analytical review procedures, statistical sampling, tests of controls and substantive tests of a company's financial statements.
