

Professional Goals

By Zhiqin Wu

My professional goal is to apply the approaches and pedagogy I have just learned from the STARTALK program to my teaching practice.

1. Take 5C national standards (Communication, Culture, Comparison, Connection, and Community) as guidelines in my teaching plan design
2. To apply teacher-fronted and student-centered approach to class
3. To conduct the communicative approach in a meaningful context
4. To use more authentic materials and expose students to a variety of resources
5. To communicate primarily in the target language in class and teach my class in immersion format,
6. To create student-centered, performance-based, task-based activities
7. To teach in differentiated approaches to develop students' language abilities to full potential
8. To use OPI, IPA and Linguafolio to design the assessments.
9. To develop students' awareness of and appreciation for Chinese culture
